the office space
together

About us

Modern glass architecture solutions by Glass System

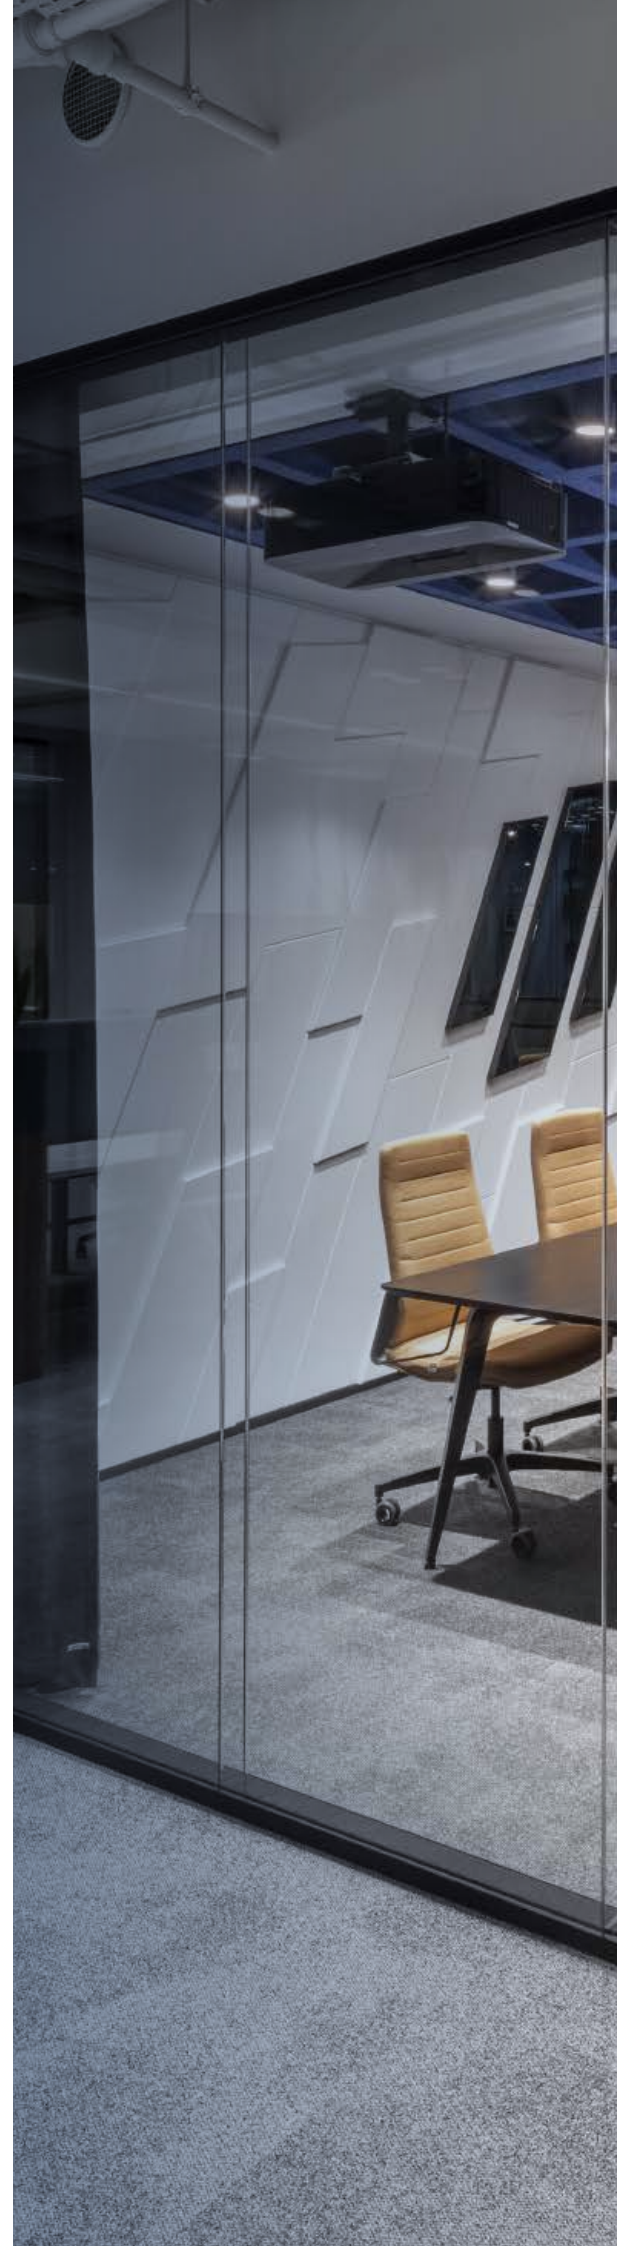

We are technology focused company, that creates unique solutions including glass wall systems and doors for interiors, distinguished by a combination of eye-catching aesthetics, guaranteeing safety as well as comfort functionalities. Our products originate entirely from our own, innovative projects.

At Glass System we help to create sustainable and user-friendly interiors, aligned with contemporary trends in design and lifestyle. We are passionate about everything we do, that is why we're constantly searching for new paths and ideas. We strive for innovation not only in terms of our products. We think out of the box in many aspects of our business. While developing our products we pay attention to the smallest detail. All of them together and individually make a difference, allowing to implement ambitious projects.

Our systems meet standards and legal requirements – primarily in terms of fire resistance and acoustic insulation as well as safety and strength. All core Glass System products are provided with the European Technical Assessment.

Our business model is based on providing technology to specialized installation companies to whom we entrust the realization of projects. The synergy that arises in this way helps us build strong relationships with our partners.

One of our key strategic points is to build international reach of the brand thus we are constantly expanding our portfolio of international clients and trading partners. We increase Glass System presence on the European and other foreign markets.
